QSL Confirmation

Date: 10/24/56      Time: 7:00am to 7:26:30am

We are directional and our towers are in line with 340 degrees true to protect the canadian clear channel. Most of our signal is in a southerly direction so i was very surprised to hear from your section of Pa. We have all collins equipment.

Very truly yours,  
*Lisle A. Dorrian*
