Broadcasting House, London, W.1

TELEPHONE: LANGHAM 4468 TELEGRAMS AND CABLES : BROADCASTS, TELEX, LONDON

Reference: 02/CME/JS

10th February 1955

Mr. Kermit Geary,
R.F.D. No. 2,
Walnutport,
Pennsylvania,
U.S.A.

Dear Sir,

Thank you for your letter dated 27th January 1955 and also the enclosed International Reply Coupon.

The London Home Service of the BBC is radiated by a high power transmitter at Brooklands Park operating on 908 kc/s, but in addition is radiated on 1484 kc/s by Ramsgate in Kent. Between 0750-0815 GMT the programmes broadcast are as follows:-

0750 GMT	"Lift Up Your Hearts"
0755 "	General Weather Forecast
0800 "	News
0810 "	Programme Parade

We think, therefore, that it was most likely our London Home Service that you heard on the morning of January 26th.

During the past winter we have received quite a number of letters reporting on reception of our domestic services in North America and, similarly, American medium wave stations have been heard quite frequently in this country.

Yours faithfully,

(J. Siller)

for Senior Superintendent Engineer,
External Broadcasting
