January 12, 1999

Mr. Kermit Geary
1266 Riverview Drive
Walnutport, PA 18088

Dear Mr. Geary:

Thank you for the kind reception notice in your letter of December 11, 1998. I have enclosed a copy of your letter and am please to verify that, according to the logs of News/Talk 1100 WCGA, you did in fact receive our station.

It is always a thrill to get letters from folks who listen to WCGA at a great distance. We value all our listeners, especially those who work at hearing our signal.

For your information, WCGA uses a Harris DX-10 transmitter into a series L-C net housed in a Kintronics Labs enclosure fed to a Ron Nott 6-wire folded unipole attached with 36 inch stand off insulators to a Stainless, Inc. brand G-25 model 24 inch face solid rod tower. My wife and four children and I plowed in 36,000 linear feet of number 10 AWG soft-drawn copper and silver soldered them to the 6 inch 99.99% pure .32 mil copper strap which lies at the base of the tower. The copper strap is attached to the tower via a silver soldered connection.

This whole project is a labor of love for me and the staff. Art Manning is someone about whom a book should be written. He is retired VOA and at one station had over 3,000 acres of curtain and rhombic antennas and a staff of 400 plus.

Let us know how we can improve, especially in the area of your expertise and interests. Please let us know how to design a response card that would be much sought after by DXers. I want to have a cool card that will be in demand and will stimulate a desire to hear our station.

Thank you again for listening. Please spread the word. And if you pray, keep us in your prayers.

Sincerely,

A handwritten signature in blue ink that reads 'Wesley Cox'. The signature is written in a cursive, flowing style.

Wesley Cox
General Manager
