We Celebrate Christ!

03 January 1991

Mr. Kermit Geary
1266 Riverview Dr.
Walnutport, PA 18088

Dear Mr. Geary,

Greetings in the Name of our Lord Jesus Christ. We here at WECC were pleased to receive your letter dated 20 December 1990. It is of great interest to us that our signal has been received at such a great distance.

WECC is owned by Casey Broadcasting, and has been on the air for five years, our General Manager is Paul Hafer. We are a commercially supported station with a format of contemporary Gospel music, and Bible based teaching programs. We are limited to day time only operation.

At the present time, WECC operates with live announcers during A.M. and P.M. drive periods, and during the noon hour, with other periods operating by automation. Our automation system is manufactured by SONO MAG Corporation, mixing is accomplished by way of HARRIS' Medalist -12 mixing board and processed by a MIC MAZE model CSP 2013 processor. The signal is fed to a HARRIS SX 2.5 A transmitter (placed in service Summer 1990) by way of a TEXAR EAGLE AM Modulation Controller. Our effective radiated power is 2.5 kilowatts by way of a UP-300 folded unipole antenna from LBA Incorporated.

In reviewing our logs for 18 December 1990 however, I fear our signal may not have been so clear as you believed. We carry no advertising for either a mobile home dealership or a drug store. Our log indicates spots at that time for an automobile dealer (Kings Bay Chrysler Plymouth, Kingsland, GA.) and a bowling center (Northside Lanes, Jacksonville, FL. (904) 757-1838,) these commercial spots would have been followed by a promotional spot for a program which would have ended as indicated by your log, and followed by music.

On behalf of Mr. Hafer and our staff, I wish to express thanks for your letter and extend to you an invitation to tune us in if you are travelling in the Southeast Georgia - Northeast Florida area. Should you find yourself in St. Marys, please feel free to visit us here at WECC>

In Christ's Service,

Darrell T. Ellison
Public Service Director
