

This letter will serve as the verification of reception report for the test program broadcast by WEKS, Marietta, Georgia, on March 16, 1987 from 1:05am to 1:35am.

WEKS is a class two 10,000 watt daytime only radio station which operates on a U.S. clear channel at 1080 kHz. It broadcasts a directional signal pattern southeast toward the city of Atlanta from a three tower antenna array located on a 10 acre site in Marietta, Georgia. The transmitter is a 1965 RCA BTA-10U AM broadcast transmitter.

WEKS' sister station is WEKS-FM which broadcasts on 104.1 MHz with 60,000 watts ERP from a tower height 1,200 feet above average terrain.

Thank you for taking part in this test. It was very interesting to hear from so many people who listened from great distances away.
