Mr Kermit Geary
RD 4 Box 321
Walnutport, PA 18088

Dear Kermit,

Thank you very much for your reception report for WGIG dated 2-23-81. The information you provided is correct, and we hereby verify.

I'm glad to know that we put in a signal at sunset and at night some times. Anytime you hear us on our regular schedule let me know!.

I believe that WGIG came on the air in early 1949, so you must have one of the first veries from WGIG.

Thank you very much for the comments on the audio. That seems to be the hardest thing for an AM station, to keep the audio clean, and I devote quite a bit of time to it. The audio response on WGIG is nearly flat to 15KC.

We also operate WSBI-FM at 100.7MC with 60kW ERP.
Again, thanks for your report!

Sincerely,

Bob LaFore
Chief Engineer
WGIG/WSBI-FM
