 January 27, 1967

Mr. Kermit Geary,
 h. D. 2, B ox 298
 Walnutport, Pa. 18088

Dear Sir:

This is to confirm your report of 1-12-67. We were on the air during the time stated in your report for a frequency check. We make these checks on the second Thursday morning of each month at 1:45 a.m.

We are a daytime station in Jesup, Georgia on 1370 kc.
 We have a Collins 21/E transmitter, one antenna 197' high.

We appreciated your report very much.

Very truly yours,

Fred G. Hodge
 Fred G. Hodge
 Chief Engineer

The 1000 watt transmitter you mentioned in your letter was replaced with the 5000 watt Collins in 1962. Mr. Nichols left this station about 1951 and Mr. Art Manning was chief engineer here until 1964. The Station was sold in 1965 and I have been chief since the change of ownership. We plan to go FM in the near future. I might add that I am very fond of our Collins Transmitter. X HXXX HXXX HXXXIXXXX

I also received report from Houston, Texas and Seymour, Conn. on the same day I received yours.
