

WRSG

Radio 1540

23 March 1981

Mr. Kermit Geary
R.D. 4, Box 321
Walnutport, PA 18088

Dear Mr. Geary;

On behalf of the entire WRSG staff, we thank you for your letter. It is very pleasing to know that 1540 WRSG is reaching listeners at such a great distance.

Your letter is significant in the fact that it is the first that we have received from Pennsylvania. We have received letters from listeners as far away as Southern Canada. Letters from Missouri, Mississippi, Southern Florida, New York, and North Georgia have arrived telling of WRSG reception. Thanks so much for the tape.

The reason we do so well on skip is two fold 1) We operate on a foreign Class I-A Clear Channel. 1540Khz is assigned to a station in Nassau, Bahamas. I have been to the city and I can't, for the life of me, understand why such a small town would get a Clear Channel, but it did. WRSG is the most southern station operating on this channel which is, compared to other radio channels, pretty open. 2) We utilize a folded-unipole radiator that projects the signal skyward, more than other types of radiators.

WRSG utilizes 1000 Watts with a Gates BC-1G transmitters that modulates with 95% peaks. Our towers is located in a good wt area, being 184 Foot tall.

I have enclosed some information on WRSG RADIO. We invite you to come see us in Sylvester, The Peanut Capitol of The World, if ever down this way.

Sincerely,
FELDMAN BROADCASTERS, Inc.
