Mr. Kermit Geary,  
R. F. D. #2,  
Walnutport, Pa.

Dear Sir:

We wish to thank you very much for the report on our test program. Your report is verified and checks exactly with our log.

Our equipment consists of an RCA 250-G 250 Watt transmitter, a 76-A Consolette speech input, a 164 tubular radiator. For a ground we use a counterpoise as we have the antenna on the roof of a four-story building.

We will appreciate any more reports you can give us on any of our future programs or tests. Our frequency check is the second Wednesday every month - 3:05 to 3:20 A.M., C. S. T.

Yours very truly,

WGIL
