Mr. Kermit Geary
R. F. D. #2
Walnutport, Pennsylvania

Dear Sir:

It is a pleasure to verify your report of reception. We are quite happy to hear we had gotten out that far.

We only operate a 100 watts but we have a high efficiency antenna system which certainly seems to be doing a beautiful job. We have 126 long ground radials and 122 short radials in an attempt to make our system approach Maxwell's definition of a perfect ground.

The transmitter is a Collins 300 PA operating at our legal limit of 100 watts into a 165 ft. shunt fed antenna. To the east of us is low lying almost swampy ground and a couple of blocks further east is a 135 ft. water tower which may be acting as a parasitic director.

We are on the air 18 hours a day usually and sign off at midnight but the night you heard us we were having a drive for the Andover Children's home close to here, which was the reason for being on so late.

Again we thank you for your notification of reception.

Very truly yours,

KEE BROADCASTING COMPANY
