

November 14, 1995

Dear DXer,

Thanks for your letter and **CONGRATULATIONS** on your reception of WSEZ on Monday, November 6, 1995. What you have expressed in your letter is correct!

I must apologize for the "form" letter. I would like to respond to each of you individually, however, the responses have been overwhelming. Last year when I conducted a test for the IRCA, I received only a few letters. This year I have received letters from Colorado, Florida, Louisiana, Tennessee, Maryland, Connecticut, Ohio, Ontario, The West Indies, and many more. I want to personally thank each of you for sending a reply. Thank You!

WSEZ is a 250 watt daytime only radio station with music from the 60s, 70s, and early 80s. Chuck Harder with the Peoples Radio Network can be heard weekdays from 2-5. We utilize a Harris MW1 transmitter, circa 1982. The test for the IRCA was at 1,000 watts, with "techno-pop" music, hopefully it stood out from all the oldies stations on 1560.

Thanks agin for your letter, and I look forward to the test next year. Anytime you would like to drop a line, please feel free to do so.

Sincerely,

Todd Edwards
Chief Engineer, WUME/WSEZ

Kermit - Its so great to hear from you again! I remember your letter from last year.

WSEZ
