Kermit Geary
R.F.D. # 2
Walnutport, Pennsylvania

Dear Mr. Geary,

Received your letter several days ago and was very pleased to hear from you. Thanks a million for your interest in our new station.

We are using Collins equipment- 300 G transmitter with 6L6 buffer; 807 IP amplifier, driving a pair of 810's. We are feeding 235 feet of transmission line, terminating in a Collins tuning unit and radiating with a 150 foot Blaw-Knox tower. Our ground system consists of 120 radials spaced 3 degrees apart, 175 feet long and covered by 48 square feet of copper mesh wire-all bonded together.

Your excellent report is in accordance with our station log. Thanks again for your response to our frequency, which is scheduled on the first Monday of the month from 3:50 A to 4:00 A E.S.T., but due to the fact that the first Monday of next month falls on New Year's Day, we invite you to tune us in on Wednesday, January 3, at that time.

If you are ever down this way drop in to see us, won't you? Best of luck!

Sincerely yours,

Tom Baldwin
Chief Engineer.
