January 13, 1951

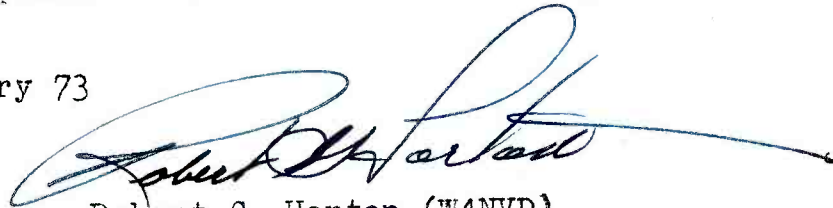

Dear Kermit,

Thanks very much for the signal report of January 9, 1951. This is our confirmation of your report. We usually run our frequency check with Kansas City the second Tuesday of each month from 12:25 till 12:40 a.m. and any time you hear us on be sure and drop us another card.

The equipment here is Western Electric, 250 watts, using low level modulation, and the antenna is a series fed job 180 feet in height.

Thanks again Kermit for the fine business report and be sure to drop us another card when you hear us and maybe this peanut whistle will be sounding something better.

Very 73

Robert G. Horton (W4NVD)
