Mr. Kermit Geary
R. F. D. 2
Walnutport, Pa.

Dear OM:

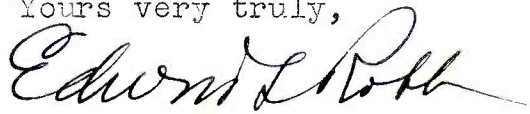

Thanks for your fine letter of May 21st, reporting our frequency check from 2:06-2:30 A.M. C.W.T., and everything checks O.K. For report on signal strength, many thanks.

Transmitter here is a 250-watt Gates transmitter using a wind charger type guyed vertical antenna 304' high operating with a power input of 1200 volts, 235 mils.

We appreciate all such reports as yours. Our signals have been heard in Detroit, Mich., at 9:30 in the morning. Also other places. Our time on the air is sunup to sundown, local.

Enclosed we will send you a picture of the studios.

Yours very truly,

Edwin L. Robb, C. E.
