Hello Kermit,

Was delighted to get your letter of the eleventh. You see I have been doing the frequency runs so it is proper that I answer your letter. Thanks for the signal report. I didn't realize we could put that strong a signal up in Pennsylvania especially with interference from local stations. I am certain that it was KPDR that you picked up as our log agrees with yours.

That "HRO" must be a good receiver. We have a Demco transmitter 2-805's in parallel in the final modulated with P-P 811's our antenna is a series fed 207' vertical antenna. We have a Western electric limiter and Gates console.

Wishing you a merry Christmas for KPDR all its personnel and myself and thanking you for your nice letter and accurate report I remain

yours truly,

Thomas Markelka
acting Chief Engineer KPDR
and KPDR-# FM
