Walnutport, Pa. 18088

Dear Kermit:

You have achieved a miracle of modern technology. Our 1 kilowatt "tea kettle" rarely gets out of Eastern Mass. let alone to the reaches of Walnutport. I played your tape for our morning man, Martin Hanley, and we both agreed it was indeed his voice, at sign on Saturday 17 October 1981 0700 hours.

Roger on the Hammarlund HQ 180. I have not had the pleasure of using that particular receiver myself. The 80 ' long wire antenna was also an important "element" in the reception of our signal.

I noticed, with some interest, your association with various radio clubs and the dates. I have been associated with the broadcasting engineering business since 1948 with another radio station of which I am sure you are familiar. WBZ in Boston, a full time 50 kw enterprise. I have been assisting my friend, the former State Senator, John M. Quinlan (note the similarity to the call letters) since he lost his chief engineer, who left for greener pastures some time ago. Holding the two jobs is not quite as troublesome as it may seem as the business with WJMQ requires much less of my time. Ham radio is also an interest, WA 1 ZGH, usually 2 meter mobile. Thank you again for your interest.
