THE SHORE BROADCASTING COMPANY

Dear Kermit:

In regard to your reception report on our DX broadcast of January 2, 1956, we are happy to send you this letter of verification. Your report is substantially correct, and very greatly appreciated.

The test went very well. We received correct reports from as far west as California and up into Canada. We had two reports from New Zealand and one from Washington state, but interference was bad. Most reports logged QRM from WEDC, Chicago, but for the most part they were overridden.

Again, TNA for your report.

Sincerely,

Wilson L. Price

PS/ Happy to hear that we boomed in so well at Walnutport. We did our best to override everything else on the channel, & we thought march music would allow us to maintain a higher average percentage of modulation. Thanks for a fine letter & report.
