

# WILC AM90 RADIO BORINQUEN

Serving the Hispanic community  
from the Nation's Capital to Baltimore, MD

3/31/86

Dear Mr. Heary,

Thanks for your interest in WILC.

Your program log for 3/8/86 corresponds with that of this station for the date indicated.

WILC, AM-90 transmits from Laurel, Maryland on an assigned frequency of 900 KHZ with an authorized power of 1,000 watts. Our main transmitter is a CCA-AM 10000 producing A3 type emission. We utilize a three element directional antenna system or phased array, consisting of three series excited, vertical steel radiators having an overall height of 245 feet. Audio signal processing is accomplished via UREI LA-4 compressor/limiter working in tandem with a UREI B1-4 modulimiter.

Best regards  
Alfred J. Hammond  
Chief Engineer, WILC
