Dear Sir:

I am sorry that your letter has not been called to my attention sooner. Thanks a lot for the report of reception, we certainly have a lot of them.

I have checked your report with the station's logs and find it to be 100% correct so you therefore may consider this a verification.

I notice that you appreciate good receiving equipment. I am using a National NC 100 X with a Jensen 18" speaker in a Bass Reflex enclosure. It has proven itself fully capable in every case.

Best DX regards and if in Salisbury, drop in and visit us,

Richard W. Bullers
