Dear Kermit,

This is to confirm reception of Radio Station WQDY...Calais, Maine.

WQDY operates on 1230 KC's with 250 watts of power as authorized by the Federal Communications Commission. Our transmitting antenna is a cross sectional guyed 150 feet high, series fed.

We are planning very shortly to go to 1000 watts of power, and we are looking forward to holding another DX Test to check on our increased coverage.

Thank you for your cooperation and am very sorry I took so long in sending this. But due to things beyond my control I was unable to take time till now.

Yours Truly,

Dale H. Wing
