Dear Kermit:

Thank you for your report of receiving station WAFB on December 3, 1968 at 12:45am EST. This letter is to confirm your report.

WAFB has scheduled a monthly test transmission for frequency monitor calibration on the first Tuesday of every month and this was the test you heard. We also check audio quality and other checks on our transmitter during this time.

The transmitting equipment at WAFB is an RCA BTA-5T transmitter operating at 5000 watts daytime and 500 watts pre sunrise and a Bauer 1000 watt transmitter used for standby operation. Our antenna system is a 315 foot series or rather shunt excited tower.

Sincerely yours

L. Van Prooyen
Chief Engineer
