Kermit Geary
R.D. 2, Box 298
Walnutport, Pennsylvania

Dear Mr. Geary,

Thank you for your letter regarding our test broadcast of November 21.

I am sorry you were unable to locate our signal in the "mud", I have had several reports from various sections on the test, mostly from the eastern area.

It would appear from your report that you did hear our earlier test transmission for frequency measurement purposes. The time and tone format agrees with the broadcast format, and it would be rather unlikely that another co-channel station would be using this particular tone sequence. The frequency test transmission ran from a little before 12:30A to a little after 12:45A, and was broadcast first with 500W, and then at 250W, for the last 5 minutes.

Our night man has just come in, and asked if you were listening to his show, "Pat's Record Room." (This show goes off at 12M)

Thank you again for your report, and best wishes for successful DXing.

Sincerely yours,

A handwritten signature in black ink, appearing to read 'Lewis E. Mann', is written over the typed name and title.

Lewis E. Mann
Chief Engineer
