January 15, 1970

Kermit,

This is to confirm as correct your report of reception of this station @ 12⁴² AM Jan 9, 1970.

WTPS was operating for equipment checks with its authorized daytime directional antenna array on its clear channel 1560 frequency. We had just made the monthly check of frequency with the required outside agency and also clearing up a case of limiter balancing.

Your report was detailed and complete in all respects, which we thank-you for. Enclosed find some of our sales propoganda, and other stuff.

Thanks Much,

Walter Sisson, C.E.
