Dear Mr. Geary,

Received your very nice DX report today and I was very happy to hear from you. I have been receiving letters from many of your club members but none quite so nice as yours. It is a real pleasure for a young radio man to get such a nice report.

First I want to say that your listing are correct. I have a program now for your club members and it will start feb., 6th and the time is four in the morning. I hope you are able to listen to us. If you have anything that you want aired then just send it to me here at the station and I will be happy to put it on for you.

The transmitter and studios of WYAL are located $\frac{1}{2}$ mile west of Scotland Neck, N. C. and this is a very small farming community 90 miles west of Norfolk, Va. and 85 miles east of Raleigh, N.C. I am the engr., copywriter, announcer, and assistant manager, so you can see we have a very small staff. This is a very big disadvantage to us because we don't have the personell to really have a big station.

The transmitter here is a Collins 21-A and is 22 years old. It doesn't give very much trouble. The tower is 188 feet tall. We have three disc jockeys including myself. One secretary, which is my wife. So you can see when we get a report such as yours it really makes all of us feel good. Again I want to say thanks and I hope you have a very good year with radio. Hoping to hear from you again real soon. If you are ever down our way drop by for a cup oc coffee and a chat. I would be pleased to meet you. The best of '73's.

Very Truly Yours,

Gary W. Joyner,
Engr.
