

Dear Mr. Kermit,

2/10/52

this card confirms your reception report of our station on the morning of November 22, 1952. We were exceptionally pleased with the completeness of your report, and happy to know that our signal reaches the east coast in such good condition.

I hope you don't mind our using post cards to answer a listener's report.

One thing that may be of some influence in the reach of our signal may be the fact that North Dakota has a ground conductivity unequalled by any other in the U.S.A.

again

Thank you
