Kermit Geary,
R.F.D. #2,
Walnutport, Penna.

Dear Mr. Geary,

Your letter was received about thirty minutes ago and we are indeed very happy to verify your reception of our station on Monday morning, March 6, 1944. We are also very happy to obtain the information given in your letter. You might like to know that you are the one holding the record for reception of KHAS. The next farthest we have ever received was Buffalo, N.Y.

We have received word that WITH ~~cuts~~ cuts in on us in the east. (Or should we say we cut in on them?)

We have a 250-K RCA transmitter which we believe is the best 250 watt outfit in operation. Our pre-amplifier is RCA 76-B1; frequency monitor RCA 311-A; modulation monitor RCA 66-A; antenna tuning unit AZ-4293 (also RCA). We use a vertical antenna with an overall height of 254' (antenna height 207'). Ground is 120 radials bonded to water pipe.

Thanking you again for your information,
Very Truly Yours,

UNLIMITED TIME

Lloyd Jones

and

Truman Walrod
