Mr. Abe Jacobwitz, V.P. of Engineering,
Radio Station W-J-R-Z,
Newark 1, N. J.

Dear Sir,

I have pleasure in reporting excellent daytime reception of your Radio Station WJRZ here in Eastern Pennsylvania. On Tuesday, October 23, 1962, I tuned in your AM station on 970 kilocycles at 11:20 A.M., Eastern Daylight Saving Time, and listened to the Steve Hollis Show until 12:00 Noon, followed by 15 minutes of the latest news until 12:15 P.M., E.D.S.T. My location is 75 air miles due West of Newark, N.J.

WJRZ's signal in this area was strong and clear, rating a good S-9 report, with an input voltage into my receiver of 15 microvolts as measured on the signal-strength meter. No fading was detected, and there was no atmospheric static. Your frequency was entirely free of interference. As the result of such favorable conditions, your broadcast was heard with perfect clarity (Readability-5), affording 100%-enjoyable program reception at this distance from Newark. Your carrier was steady, clean-cut, and fully modulated. The tonal quality of both speech and music was excellent. It is a pleasure to hear WJRZ reaching over here into Pennsylvania in such fine shape, and you are to be congratulated on the power and efficiency of your transmitting equipment.

My receiver is a National "HRO" 9-tube communications-type superhet, 1935 model. I was using a single-wire inverted "L" antenna, 200 ft. long and 30 ft. high, extending toward the Southeast, with the lead-in to the receiver coming off the Northwest end. My ground connection is made to an iron water pump in a well 175 ft. deep.

Please confirm my reception of station WJRZ on 970 kc. I shall be happy to receive your reply, kindly verifying the fact that I heard your broadcast as reported above. Return postage is enclosed for your reply. As proof that I was tuned to WJRZ, I give the following log of the broadcast to which I listened:
