Mr. Kermit Geary,  
R.D. 2, Box 298,  
Walnutport,  
Pennsylvania,  
U.S.A. 18088

Dear Mr. Geary,

Your letter of April 7th addressed to the Engineering Department, CBA, Sackville, N.B. has been passed to me for reply.

From your description of reception it certainly appears that you received one of our two low power relay transmitters, broadcasting at 1140 on the dial - Andover, N.B.-CBAN or Shelburne, N.S.-CBAP. They are 40-watt unattended stations programming from our national network. They do not transmit any station calls and the 30-second period at the end of each program, which normally for station identification, is therefore dead air on these transmitters.

Thank you for taking the time to write to us. I will certainly bring your letter to the attention of our program officers here.

Yours very truly,

Peter MacGillivray,  
Information Services.
