Dear Kermit,

Thank you for your reception letter of 1/2/95.

From the details of your log , and a comparison to the station and music logs, it appears that you were indeed listening to WKLY. However, WKLY does not operate in the new expanded AM band. The station operates at 98.9 MHz in the FM band.

There have been other reports similar to yours asking confirmation of reception of WKLY on 1620 kHz. The station is obviously being rebroadcast by a pirate radio station.

Sincerely,

David J. Lane, Chief Engineer
