

Yes, it was WRKL that you received on 2/14/65 at 5:23 PM.
WRKL operates Directional Daytime on 910 KC from New City,
New York with twin towers 270 feet tall. WRKL began broad-
casting on July 3, 1964 with 1000 watts of power.

As we're still a young station please excuse the delay
in answering your request for confirmation. We hope to have
QSL cards in the near future and we will send you one as
soon as we get them.

Thank you for taking the trouble to write to us. The
technical information is useful to us in determining just
how well our signal is getting out.

Good luck,

Peter P. Brooks
Chief Engineer
