Hi: KERMIT

Glad to hear from you and receive your report, dated 1/3/65. I look forward to getting QSL's from people like yourself. I know how interesting it is to tune across the AM band and pick up DX. This was a hobby I followed for several years myself. I don't believe I was quite as good as you though, for I only logged about 250 stations in that time. We have a map of the U.S. in the Engineering Dept. that has a marker on it for all the QSL's and a list of names and addresses below it; you're # 8. The following is a description of the gear we have on the air:

Xmitr - GATES BC-1G 1000/250 watts

Ant - 2 175 ft. towers lined up north & south with a broadside pattern along Lake Erie.

Wire - Associated Press

QTH - N. Lat.: 41 degrees 51 minutes 25 seconds  
W. Long: 80 degrees 49 minutes 39 seconds

Est. - February 1964

If you're ever in Ashtabula drop in and we'll give you the \$1.25 tour.

Happy DXing
