This is to confirm your reception of WMVR AM on March 28, 1977. Your report of transmission for the last week of March and into April is very accurate. Time was from 6:00 to 6:15 A.M. EST.

We operate on a frequency of 1080 kilohertz with a power (daytime directional) of 250 watts. Our sign-on changes from month to month because of a partial pre-sunrise agreement with the local sunrise time at WTIC in Hartford, Connecticut.

Sincerely,

Michael O'Riffey  
Program Director
