Walnutport, Pa.

Studios and Offices:
SUITE 102, 103, 103-A
MASSILLON DRIVE-IN HOTEL
412 LINCOLN WAY E.

Dear Sir:

Thank you for sending your report of reception during the WTIG-NRRC test program. WTIG operates on a frequency of 990 KC with a directional antennae system, (3 towers) with a pattern in a southealy direction, see below. We use a collins 300 J-2 transmitter with a collins custom built phasing cabinet. All 3 towers are 200 ft. high. Transmitter site is located 4.3 miles N.W. of Massillon, Ohio. Interference was reported in almost every report from stations, WCFT, WHOO, + WTRF.

Sincerely,
Joseph Fish Jr.,
Chief Engineer.
