Main Studios and Transmitters
Woodmont, Bellaire, Ohio

Dec. 7, 1947

Dear Mr. Geary:

You have certainly given a complete report of our equipment test on Nov. 29, 1947. Thanks very much for this very fine report. This has been the most complete report we have received so far.

I am sorry I did not get around to answering this report sooner. I have been very busy getting WTRF-FM on the air, etc. We have a 10KW G.E. FM transmitter with a 4 Bay G.E. Antenna giving a radiated power of 20KW on 100.5 mc/s

Very truly yours,

George T. Cowen
Chief Engineer
