

Jan 29, 1960

Congratulations on receiving WWIZ.
This is your confirmation of reception report.

WWIZ operates on 1380 Kc. power 500 watts using
a 200 ft. series fed guyed radiating tower.
A type 833A vacuum tube is used in the final
amplifier of the transmitter, which employs
high-level plate modulation. Modulators are 810's.

Location of the transmitter is in Sheffield
township, about 2 miles south of Lorain city
and the studios are at 1615 Broadway, Lorain, Ohio
