KLAMATH FALLS, OREGON

Kermit Geary

Dear Sir:

We wish to take this opportunity of thanking you for reporting Reception of our Test Broadcast which we conducted 20th January. between 1:16 AM PST and our signing off at 3:43 AM PST. We Cut our carrier at 2:17 AM according to our Studio clock(which isn't always correct) We came back on at 2559 AM and remained till 3:05. We came on again at 3:30 and remained till 343 AM

We had to do some long PUT-OFF work on our RIG and we don't happen to have a Dummy antenna, so we just had to do the next best thing.

Our Rig consists of a 42 xtal osc. , 807 Bifr., into an 836 (class B) driver., Driving a pair of ²¹¹ ~~811~~-A's....These are Modulated by a pair of ⁸³⁸ ~~811~~'s and thats about it. We only run 100 watts as you probably already know so naturally we appreciate all DX replys and verifications.

Wishing to thank you once again. We remain a thankful staff.

Sincerely
Robert F Davenport
