

KFLW

The American Broadcasting Co.

KLAMATH FALLS, OREGON

March 10, 1950

Kermit Geary
R.F.D. #2,
Walnutport,
Pennsylvania

Dear Sir:

Thank you for your DX report. You undoubtedly heard our nightcap news cast on the night of March 5th. However the music that followed was from another station, as KFLW leaves the air at approximately 11:10PM nightly. That is unless the announcer on the news is a little long winded, which is usually the case.

The reason for the letter is that it occurred to me that the station carrying the concert music would probably be a new one for your log, as you thought it was a continuation of KFLW's schedule. Of course I realize that there are any number of stations assigned to our operating frequency, but if you tune 1450 after we leave the air at 11:10PM P.S.T. perhaps you can get the other station too. At any rate it's a thought.

I'm glad to send you the enclosed card, and I can realize your feelings along that line. I am not a broadcast DXer, but I am a ham, and there are a number of stations I have worked that I wish would QSL.

By the way, your letter was addressed to the Chief Engineer; he is out of town, and since my job is to act in his behalf, technically, and otherwise in his absence, I am answering. However if he were present you would have received a prompt answer. He too is a ham and knows the value of a QSL card. The Chief here at KFLW is Gib Walters.

Well guess that covers all the important points so thanks again for the report, and hope you log many choice stations in the future.

73's & DX
