Mr. Kermit Geary
R.D. 2, Box 298
Walnutport, Penna.

Dear Mr. Geary:

This is to confirm your report of having received the
Conelrad Test on Monday, April 14, 1958.

I might also say that yours is the most complete report
we have ever received since the institution of Conelrad in Phila-
delphia.

It is very difficult to predict the pattern of the signals
because, as you may know, the antennae are not specifically resonant
for 640 or 1240 kcs. so the predicted patterns for their assigned
frequencies go out the window.

Thank you very much for your interesting report.

Sincerely,

E. W. Haldeman,
Radio Officer.
