Laceyville, Pa. May 9, 1946.

Dear O.M. :-

I received your report on my 1580 K.C. signal for which I want to thank you. This was on April 18, 1946 at 7:25 to 7:50 P.M.

I was running low power about 5 watts using an inside loop for transmitting and according to tests made here was not getting out more than about 3 to 4 miles so was very much surprised to get the report from you, you sure have a good receiver. A month or so before I was using a long outside antenna and was heard by Dave Thomas.

I would appreciate your keeping this confidential as much as possible.

Thanks again and wishing you lots of DX
