Dear Mr. Geary,

This letter is to confirm your reception report of WASP on Dec. 21 and Dec. 22, 1968. We like to hear from National Radio Club Members as we just began operations on Aug. 2, 1968. We operate with a Gates transmitter and our 265 ft. tower is located on the highest terrain in the area.

WASP has applied to the F.C.C. for 5,000 watts and it's believed that with a two tower directional system, this should be approved by summer of this year.

Reception reports like yours have been received from as far north as Buffalo, N.Y. as far south as Columbia S.C. east from Patterson, N.J. and west from Knoxville, Tenn.

Thank you for your letter and report.

Sincerely,

Phil Crysler
