

RADIO STATION

W100

33 W. High St.

Carlisle, Pa. 17013

Dear Mr. Heary

Thankyou for your vary fine report dated July 25, 1965. Reports like make us here at W100 feel real good. Letters like yours make our job seem a little easier.

As you may know a broadcast station is always after critical reports.

When I recieved your letter I checked the log in your letter against our station log and they compare exactly.

We have been assigned 1000 Kc. as a transmitting frequency. Our transmitter is about 81% efficient with approximatly 1000 watts to the antenne. Our tower is 254' high and we have 360 al. ground radials.

Thank you once again

Randy Greenway
CHIEF ENGINEER W100
