

Feb. 1, 1984

Dear Kermit,

We are very pleased to receive your report of Nov. 30, 1983. Please find enclosed a copy of our log for Nov. 30 from 6 to 7 AM.

Our transmitter is the RCA BTA-1R1, a 1 kw. machine that we run at 500 watts day time and 466 watts PSA. Our audio processor is the Orbin "OPTIMOD". The tower is 170 feet tall and located 1½ miles of Troy. Studio gear is new Harris.

We went on the air March 3, 1983 and are getting ready for our one year birthday party .

Your system sounds real good, at home I use a Hallicrafters HT37 transmitter and the SX111 receiver. The older tube type gear works a lot better than some of the solid state I feel.

Thank you for the report and good luck.

Very truly yours,

James Appleton
