Ref: QSL of dx Test

Dear Kermit,

I am pleased to receive your reception report of our January 2 program test. Your description of content is quite accurate. I was pleased with the overall response of this test, for we received in excess of twenty replies. Perhaps next fall we will run a similar test, but later in the morning so some DX'ERS in the West may also receive our signal. WWSW broadcasts twenty-four hours a day at 970 kHz with output power of 5 Kw both day and night with changing patterns. Our main transmitter is a Continental 315F (mid 70's vintage), while our backup is the original Westinghouse serial number #3 from 1949. From October of 1992 till about a year ago we had been broadcasting in Motorola C-Quam stereo, however management decided it served no purpose to our audience, so it was terminated. Good luck at your hobby, and happy DX'ing.

Very Truly Yours,

A handwritten signature in black ink, appearing to read 'Phillip P. Lenz', written over a faint, illegible stamp.

Phillip P. Lenz
Assistant Chief Engineer, WWSW
