

F/O C. Cassidy  
Manager, Radio CFSE  
Royal Canadian Air Force  
Senneterre, Quebec

March 23, 1964

Kermit Geary (18088)  
R.D. 2, Box 298  
Walnutport  
Pennsylvania, U.S.A.

Dear Mr. Geary:

We were very pleased to hear from you once again. We would like to thank you for your patience in waiting for a reply from us. The reason for the delay was because there was a big change in the staff of CFSE. Our Manager, Chief Announcer, and our Secretary were all changed. In the change, there was a misplacement of many DX Reports, yours being one of them. But, now we have straightened nearly everything out and have started to reply to you and your fellow DX'ers.

After a check of our log, we are very pleased to verify your reception of CFSE on your mentioned dates. The following is a short summary of the technical features of our station:

1. 50 watts power output
2. AT3 transmitter
3. Long wire 225' mismatched to detune transmitter
4. 1450 Kc's assigned.

You stated that lately our DX programmes have not been picked up. The probable answer for this is that we just had our transmitter re-tuned and we are now right on 1450 Kc's. We have had many DXer's ask us if we had changed our position. The above is the reason for not picking us up. We are seriously thinking of putting DX programmes on every Saturday evenings but that is still in the planning stage.

For your own information, the new Manager is Flying Officer Cliff Cassidy, the new Chief Announcer is Tony Mauza, and the new Secretary is Al Harvie.

Once more we thank you for your patience in waiting for our reply and hope to hear from you and your fellow DXer's in the very near future. All the best in your future DXing.

Sincerely yours

  
F/O C. Cassidy  
(Manager CFSE)
