1300 BOULEVARD LAURIER — QUÉBEC

JACQUES LA ROCHE — PRÉSIDENT & GÉRANT-GÉNÉRAL

Quebec City, March the 30th 1960.

Mr. Kermit Geary,
R.D. 2, Box 298,
Walnutport,
Pennsylvania,
U.S.A.

Dear Sir,

We received with great pleasure your letter dated March 7, showing that our station reached you, in Walnutport.

The description of the signal strength your give us means that the signal, at that time, was very good. Of course, we cannot assure you of a continuous good signal, because your location is quite far from here, and away from our normal radiation pattern direction.

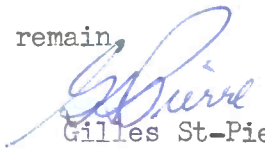

We are operating on 1060 Kc/s, with a power of 5000 watts, and a directional radiation pattern directed towards a line 60° East of True North.

According to our program logs, the description you are giving us about our programs is right, and we are sure you were actually tuned to our station.

We are enclosing herewith a copy of our contour map which indicates our coverage to a certain extent. Our signal goes much further away, as you know, but our basic territory is the one indicated.

We are sorry for the delay in answering to your letter, but finally we could find a few minutes to do it. It was a pleasure.

Hoping to hear again from you, we remain,

Gilles St-Pierre,
Chief Engineer,
CJLR STATION.
