TROIS-RIVIERES, QUE.

February 28th, 1955.

Mr. Kermit Geary,  
R.F.D. no. 2,  
Walnutport,  
Pennsylvania, U.S.A.

Dear Sir:

I acknowledge receipt of your DX report and I thank you very much for it. We are glad to know that you were pleased with our special DX program dedicated to the members of NRC and NNRC.

The informations you sent us back will be very useful to our engineering department which will make a thorough analysis of the contain. You and most of the DXers noticed some interference caused by Station XEQR or XEQK in Mexico City, also operating on 1350 kcs. According to the majority of the reports made by DXers, we finally came up to the conclusion that XEQR or XEQK might have occasionally been as strong or stronger than our own station, but also that some of you DXers probably got mixed up by our Spanish announcements also made occasionally through our whole program. Of course it also depends on the strength of our signal in your own locality compared to XEQR's or XEQK's.

Anyway, your report was right in all its extent and we thoroughly controlled the details therein as being correct.

Consequently, many thanks for the wonderful cooperation brought to make our test program a real success and best wishes to you personally,

Yours very truly,

A handwritten signature in blue ink, appearing to read 'Louis Dufresne', written in a cursive style.

LOUIS DUFRESNE,  
Program Director.

For C K T R and the staff.

LD/lp

P.S. Thanks for the kind words on our power efficiency and transmitting equipment and best regards to the State of Pennsylvania.
