

NUMBER ONE IN SOUTHERN RHODE ISLAND

WKFD 1370 RADIO

February 23, 1976

Dear Kermit,

Thank you for your letter detailing your reception of WKFD, on the morning of Feb. 19, 1976. Your report was most complete, and very interesting. I must comend you on your exceptional receiving system, it really must do a very good job for you.

This letter confirms your reception of WKFD on Feb. 19, 1976. We use a Raytheon RA-1000 transmitter with a power output of 500 (five hundred) watts, feeding aseries excited tower (112ft) in a salt water basin in Narragansett Bay.

Again, thank you for the very complete report. I am glad I was able to give DXers a chance to hear the station, and hope to hear from you when I run the test this week from WPEP. I see that you use a HQ-180. I use a HQ-170A in my hobby Amateur Radio, and find it to do a excellent job. Again, good luck in DX hunting.

Sincerly,

Eugene R. Faltus
