**DIRECTORIA**

Mr. Kermit Geary  
R.F.D. 2  
Walmitport  
Pennsylvania  
U.S.A.

Dear Mr. Geary

We were extremely happy to receive your letter of March 15th.-Indeed, needless to say, we were surprised to learn that Radio Cultura's signal reached as far as Pennsylvania.- This from a technical point not only is interesting but also far our personal satisfaction.

As to technical information we have the latest RCA. installations throughout our station with the strength of 10.000 watts level modulation. Our tower is 120 meters high in 1/2 waves, located just outside the city of Sao Paulo next to a little pond. We transmit from 6 a.m. to 1 a.m. Sao Paulo time.

Your report was quite correct and we would appreciate very much for our own personal information if you would try to receive our signal again and advise us if this one time is just freak happening or whether it is possible to receive our signal with some degree of regularity this was the third time we got any report from the U.S.A. We are enclosing one of our catalogs which might prove interesting to you.

Hoping to hear from you again, we remain

Cordially Yours.  
SOCIEDADE RADIO CULTURA  
"A Voz do Espaço"
