Mr. Kermit Geary,
Walnutport,
Pennsylvania,
U. S. A.

Dear Mr. Geary :

We received your letter of the 8th inst. informing us that you heard our long-wave station "Radio Cristal" in good reception-conditions on Friday evening, November 7. It was extremely kind of you to send us such detailed a report about the reception of our programs and we want to thank you very much for your congratulations upon our transmitting-equipment (a view of which we enclose).

Believing that a Good Neighbor Policy is worth little without a mutual acquaintance among the american peoples , we think that the broadcasting-stations of all America and the personal relations among the radio-friends will contribute a great deal to the realization of that noble ideal.

In keeping with this spirit of good will and friendship, we shall be glad to broadcast for you and your friends on Saturday evening, December 6 , from 11 to 11:20 pm. a special program which you may tune in on our frequencies of 720 kilocycles (Long-wave--5.000 Power-Watts) or 4.855 kilocycles (62-meter -short-wave-band----1.000 Power-Watts). We hope you will enjoy listening to this program and please, let us know the conditions of your reception.

It is quite our wish to keep up with you a connection that may prove pleasant and useful. Once more, many thanks. With all good wishes and kindest regards,

Cordially yours,

R A D I O C R I S T A L

Cristobal Paez G.
