October 24, 1988

Kermit Geary
1266 Riverview Drive
Walnutport, PA 18088

Dear Kermit:

This will confirm your reception of WJTZ, Blountville, Tennessee on October 11, 1988 from 6:52 PM to 6:59 PM.

We have had some difficulties with our mail during the past year after changing call letters and changing our address. This may have been the reason I did not receive your first reception report.

WJTZ began operations on 640 Khz on October 23, 1987. The former call letters were WGOC. WGOC was licensed to Kingsport, Tennessee and operated on 1090 Khz with 10,000 watts daytime only.

WJTZ operates on 640 Khz with 5,000 watts day non-directional and with .81 kilowatts directional nighttime. The main lobe for directional is to the southeast, 120 degrees from true north. The daytime tower is a 450 foot in height. A second 190 foot tower is used to provide the correct pattern for nighttime directional.

Blountville is located near the center of the Tri-Cities of Bristol, Kingsport and Johnson City, Tennessee. Operating from this site, WJTZ's 5 Mv/M contour encompasses all three cities, both day and night, and is the only AM station in the Tri-Cities to provide complete fulltime AM coverage.

Kermit, thanks for your reception reports on WJTZ and good DXing in the future.

Kindest regards,

Mitch Sandidge
Chief Engineer, WJTZ

The Total Package.
